YOU CAN HELP DESIGN...

The Fastest, The Best Planned, and most Accurate Estimate
...FOR YOUR CABINET PROJECT

YOU DO THIS PART...

...WE DO THIS PART

Project Planning – The Most Important Part

We feel we can improve the quality of our service to you by providing some basic information about our cabinetry. From this you can decide what features you want, where you want them and approximately how much it will cost you. Follow these simple instructions or bring in your blueprints and we'll give you a price on the spot!

Instructions for measuring your Kitchen:

1. Measure whole room not just area where cabinets will go.
2. Start in corner and work around room recording all dimensions.
3. Measure from corner to window or door frame.
4. Measure door or window from outside frame.
5. Measure from outside the frame to next opening or corner.
6. Continue around room in same manner.
7. Be sure to mark in all receptacles and switch plates, air and heating vents or rads.
8. Measure from corner to center of sink and record dimension and make a note as to whether plumbing comes up through floor, from the wall or from the corner to the sink area.
9. If you have an existing range hood vented outside, measure to center of range hood from corner and record dimension.
10. Make a note of any unusual obstructions in your kitchen (e.g. vent pipe in corner or bulkheads over stairway).
11. Outline areas where you would cabinets to be installed (Plan will be discussed with you by one of our qualified designers.)
